ACHIEVEMENTS OF THE
PROJECT

01 | THE GOAL OF THE PROJECT

Positive and permanent behavioral changes have been achieved in society on issues such as increasing the level of awareness in the society regarding the protection, development and improvement of our environment, environmental awareness and separation of waste at the source.

It is aimed to increase public awareness on Environment and Zero Waste Project issues, to ensure participation in social responsibility projects, and to contribute to the home economy of the Selcuklu people.

03 | IMPLEMENTATION PLAN OF THE PROJECT

- Within the scope of the Waste Bank (Atık Kumbaram) Project; Recycling waste generated at home is collected separately at the source and brought into the economy in 4 steps.
- Service is provided to all citizens living in our district between 09:00-17:00 for 6 days except Sundays.

1st STEP

- Citizens can become members by filling out the form by bringing their paper-cardboard, plastic, glass and metal waste to Waste Bank (Atık Kumbaram) points.

2nd STEP

- Wastes collected separately at source; It is weighed and taken by the officers according to the type of waste.

3rd STEP

- Waste fees are loaded onto Waste Bank (Atık Kumbaram) cards.
- The loaded TL information is also transmitted via SMS.

4th STEP

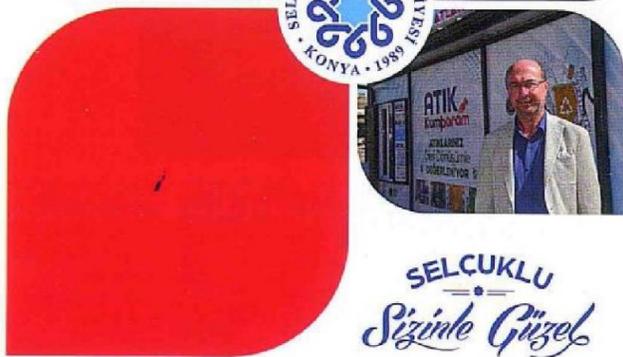

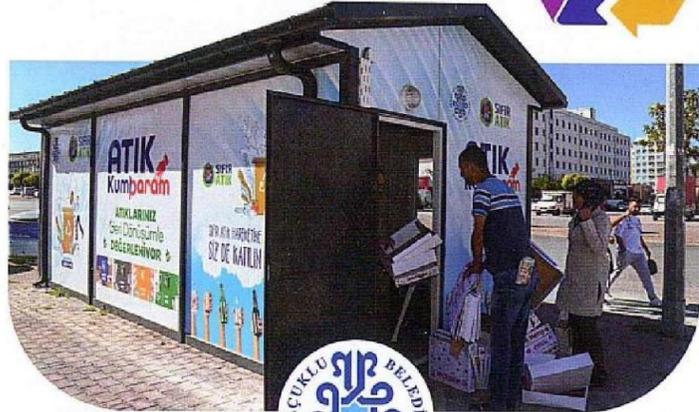

- Our citizens can spend the Liras accumulated in their waste money cards at contracted markets or member businesses.

ATIK Kumbaram

Projeye nasıl katılacaksınız?

Projeye katılmak isteyen 18 yaş ve üstü vatandaşlarımız kağıt-karton, plastik, cam veya metal atıklarını Atık Kumbaram noktalarına getireceklerdir. Burada dolduracakları formla atıklarını belediye görevlisine teslim edeceklerdir. Belediye görevlisi tarafından kayıtları oluşturularak manyetik özellikli Atık Kumbaram Kartı vatandaşlarımıza verilecektir.

04 | ACHIEVEMENTS OF THE PROJECT

ENVIRONMENTAL

The amount of waste sent for recycling has been increased.
The amount of waste going to disposal has been reduced.
Waste was recycled into the economy.

ECONOMIC

The development of the country was supported by ensuring that the collected waste was recycled into production. Citizens were supported economically.

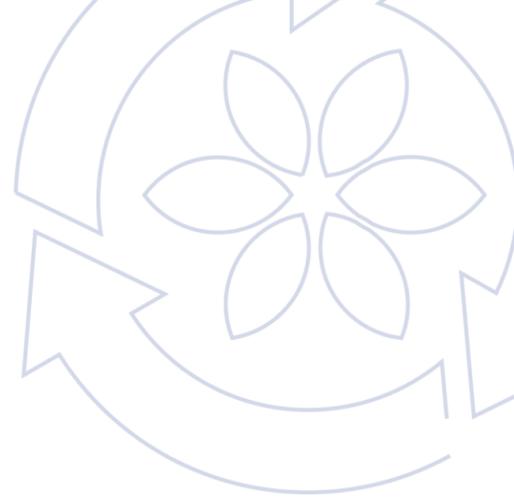

SOCIAL

Zero waste living methods have been implemented in households.
Partnerships have been developed for social responsibility.

AWARENESS

A sense of “Conscious Consumer” has been achieved.
Within the framework of circular economy, the habit of separation at source has been introduced to the public.

ATIK Kumbaram

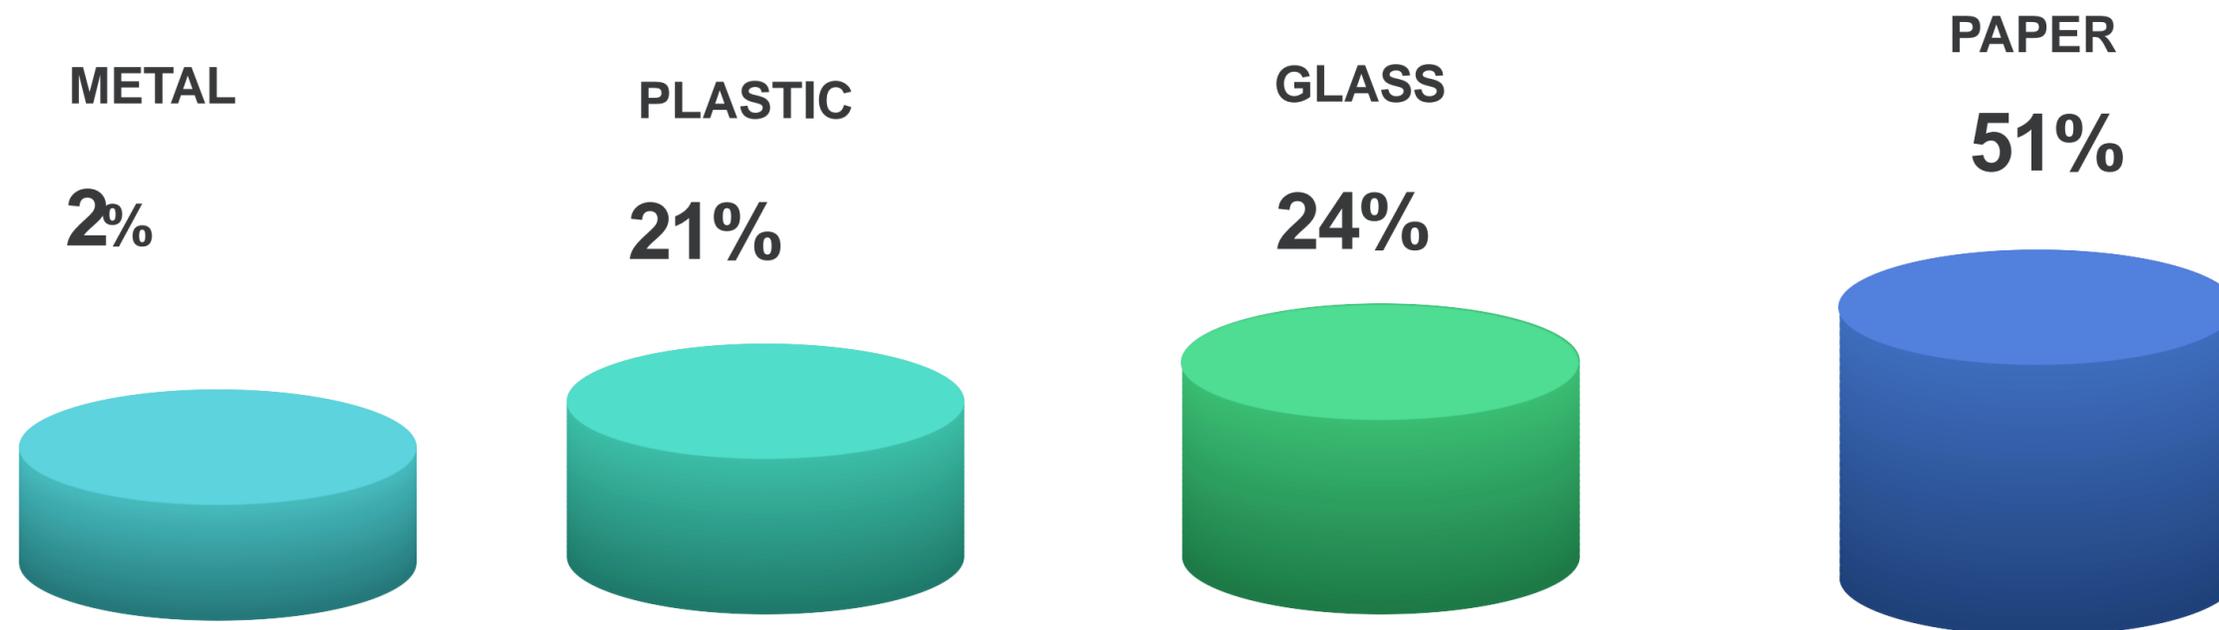

Within the 16 months of Waste Bank (Atik Kumbaram) Project;

4.727
Member participated
to the application.

425.000,00 TL
Has been loaded
On the Waste Bank (Atik
Kumbaram) Card

Approximately
460 tons
Recyclable waste was
collected.

Distribution by Waste Types
